*Full Stack Engineer*

To Hiring Manager,

I am writing to express my interest in the Full Stack Engineer position at Tucows. With a strong background in back-end and full-stack development, I am excited about the opportunity to contribute to Tucows's mission of keeping people connected and the Internet open.

During my 5 years of industry experience, I have successfully designed and developed large-scale applications, collaborating closely with clients and engineers to deliver solutions that meet their specific requirements. As an Intermediate Software Developer at Clir Renewables, I worked closely with the engineering team to enhance the capabilities of software used for wind turbine data analysis. I provided valuable insights and implemented features that improved data visualization and user experience. My experience in collaborating with multidisciplinary teams and translating complex technical requirements into practical solutions makes me well-prepared to contribute to the development and maintenance of the Tucows's ecosystem.

I am proficient in developing and maintaining complex software, particularly in JavaScript/Typescript with React, with extensive knowledge of back-end languages such as Python and Go. I have a strong ability to design and implement effective software solutions, rapidly delivering well tested and well documented code. I am also experienced with layout tools such as Figma.

I have attached my resume for your review, which provides further details of my qualifications and experiences. I would welcome the opportunity to discuss in more detail how my skills align with the requirements of the Full Stack Engineer position at the Tucows. Please feel free to contact me at your convenience to schedule a conversation.

Thank you very much!

**Joey Parker**
